'A hidden treasure in Warwick'

I'd like to add to the compliments given to Dr. Robert Feldman in the May 18th edition of The Warwick Advertiser by telling of my experience with Dr. Feldman.

I was recently scheduled for surgery with a surgeon from one of the large conglomerate medical systems in the area. My pre-operative visit with the doctor lasted about five minutes. The doctor just "told" me what he was going to do and said that I would be unable to do anything but level walking for four weeks after the surgery and if I didn't follow this protocol I would risk failure of the procedure.

Anyone that knows me knows that this would be completely impossible. There is no way I could sit around for

four weeks.

I sought out another surgeon for a second opinion and found Dr. Feldman.

Dr. Feldman spent so much time with me. He explained the three options I had for this procedure and allowed me to choose the one that best suited me.

The procedure had almost no downtime and without any greater risk of failure I was back to normal activity in two days.

I would highly recommend Dr. Robert Feldman for any surgical procedure that he performs.

He is a hidden treasure in Warwick.
